

National Asthma and COPD Audit Programme (NACAP)

Uses of pulmonary rehabilitation audit data

Version 1.3: February 2019

Data collected as part of the National Asthma and COPD Audit Programme (NACAP)'s pulmonary rehabilitation (PR) audit is used and presented in many different ways. Below is a table detailing the main audit outputs along with the level of reporting, data items presented, where they can be found and how often the output is published:

Output type	Output level	Data items included	Where can I find this?	Frequency
Sustainability and Transformation Partnership (STP) report	STP & Service	<ul style="list-style-type: none"> Number of cases audited Start date offered within 90 days of receipt of referral (for non-AECOPD patients) Patients undertaking a practice exercise test Patients assessed for PR who go on to have a discharge assessment Patients with a discharge assessment who received a written discharge exercise plan At least one exercise MCID achieved for ISWT/6MWT At least one health status MCID achieved 	www.nacap.org.uk	Published every 6 months starting November 2019
National clinical and organisational audit <ul style="list-style-type: none"> Main report Benchmarked results 	National Service	<p>All data items collected as part of the clinical and organisational audit datasets.</p> <p>Selected key indicators collected as part of the clinical dataset benchmarked against national figures.</p>	www.rcplondon.ac.uk/nacap-pr www.rcplondon.ac.uk/nacap-pr	Published in Spring 2020 (6 months of data) and then annually

<ul style="list-style-type: none"> • Patient report • Data included in the main report 	National	Selected key indicators collected as part of the clinical and organisational datasets summarised nationally for patients and the public.	www.rcplondon.ac.uk/nacap-pr	Published in Spring 2020 (6 months of data) and then annually
