

# Care received by patients with Chronic Obstructive Pulmonary Disease (COPD): **National data collection**

---

This general practice is involved in a national project to help make the care of patients with chronic obstructive pulmonary disease (COPD) better.

This project is called the **National Chronic Obstructive Pulmonary Disease (COPD) Audit Programme**.

We will be collecting information about all patients diagnosed with COPD and the care they receive from their GP surgery. This includes confidential information.

This information will be used to help make improvements to the care which COPD patients receive.

For more information about how your information will be used, and what to do if you do not want your information included, please ask a member of staff for a leaflet.
