

## Addendum to National audit of inpatient falls 2015 - RCP audit results

Following the publication of the National Audit for Inpatient Falls audit report, we were approached by some trusts expressing concern about the accuracy of the data they submitted.

We have been informed that the correct data for 2014 for the following trusts is as follows:

	Total occupied bed days for 1 January to 31 December 2014	Total number of reported falls between 1 January to 31 December 2014	Falls per 1,000 OBDs	Falls resulting in moderate/severe harm or death per 1,000 OBDs
North Tees and Hartlepool NHS Foundation Trust	177792	1547	8.7	0.38
Buckinghamshire Healthcare NHS Trust	270101	1630	6.03	0.15
Northern Devon Healthcare NHS Trust	161034	1487	9.23	0.16
Nottingham University Hospitals NHS Trust	546586	2589	4.74	0.12
Bradford Teaching Hospitals NHS Foundation Trust	193127	1612	8.35	0.14

A second round of data collection will take place in April/May 2017 this will include collecting the total occupied bed days, total number of reported falls and the number of falls resulting moderate harm, severe harm and death for 2015. We will also recalculate the national baseline for 2014 using these correct figures so that a more accurate comparison can be made.
