Procedure for measuring lying and standing BP

> Use a manual sphyg if possible.
> Lie down 5 minutes. Take BP 1.
> Stand up. Take BP 2 in 1st min.
> After 3 minutes, take BP 3.

Continued opposite >>>
A positive result is:

- A drop in systolic BP of 20mmHg or more.
- A drop to below 90mmHg on standing.
- A drop in diastolic BP of 10mmHg with symptoms.
